

# TECHNICAL BULLETIN / Products Updates

## Products available from the 2<sup>nd</sup> quarter

Dear Customer,

During the first quarter of 2021, our R&D team worked determinedly on developing several new products or product upgrades. As a result of this great effort, Global Fire Equipment is delighted to introduce the following products to our extended portfolio of fire detection products:

### OCTO+ Large Box (NEW)

The OCTO+ Large Box features an expandable loop capacity from 1 up to 12 analogue addressable loops (giving a total of 128 loops in a single system) in a large aluminum box. In this cabinet there is enough space capacity for 4 x12V 12Ah backup batteries.

### BUILT-IN-PRINTER (NEW)

The updated version of the BUILT-IN-PRINTER has a 40 column internally mounted thermal printer that provides a hardcopy of the OCTO+ panel log containing all relevant events occurring in the system.

### INT-TCP-WEB (NEW)

The INT-TCP/IP-WEB is an interface adding new advanced features and functionalities to GEKKO, G-One and OCTO+ panels. Its enhanced hardware allows for an easier integration with existing LANs via Wi-Fi or optional Ethernet cable.

### NFC KEY (NEW)

The new GFE-NFC-KEY is an easy and fast way to gain control via the NFC Touch with access card or optionally key fob. The NFC Key is a safe and convenient way to enter your Chameleon fire alarm control panel.

### PHYSICAL KEY (NEW)

Metal Key for user access to GFE fire alarm control panels.

- Provides authorised users with access to a fire panel's authorised user controls.
- Manufactured in metal for extra strength.
- Compatible with GFE fire alarm control panels, i.e OCTO+, GEKKO, NODE+ and G-One.

### EARTH BAR (NEW)

Brass earth grounding bar with 10 screw contacts and green plastic covers for easy fitting in any of GFE fire alarm control panels.

## MULTI IO

The MULTI-IO is a fully monitored addressable module which can be used with Global Fire Addressable fire alarm control panels. The module provides four Zone Monitor Units, three Sounder Output Units and two system auxiliary Relays.
